

Quality Policy

The purpose of the Quality Assurance System is to establish a standard for conducting business that will sustain Analytical Industries Inc. as a worldwide industry leader and command the respect of customers and competitors alike.

It is the policy of Analytical Industries Inc. is to design, manufacture and distribute products that will conform to customer application needs, published specifications, standards for quality, perform reliably and provide sufficient margins to provide for the organization's continuing growth.

The quality assurance system as outlined in the Quality Manual and augmented by the documentation of supporting procedures has been designed to achieve this policy. The primary objectives of the quality assurance system are:

- Formalize processes to ensure the consistency of product delivered to our customers.
- Comply with local and international requirements to further our business opportunities.
- Improve overall management of the organization by establishing good business practices.
- Ensure responsibilities and authorities are defined, documented and communicated.
- Establish awareness of the quality assurance system and its continuing improvement as a step toward increasing customer satisfaction.
- Analyze key data to demonstrate the adequacy, effectiveness of the quality management system and identify opportunities for improvement.
- Assure equipment and protective systems intended and independently certified for use in potentially explosive atmospheres comply with Annex II of ATEX Directive 94/9/EC.
- The measure of improvement is expected to be a minimum 5% improvement annually.
- The quality objectives shall be communicated through the Quality Policy and measurable using the information tools specifically identified as Key Data by P-1069.

Frank S. Gregus, President
